Chapter 11: How Attendance is Calculated

Attendance is calculated based on daily electronic badge scans and digital workstation authentication timestamps.

A standard working day requires a minimum of 8 logged productive hours between 08:00 AM and 08:00 PM.

A grace period of 15 minutes is permitted for morning arrivals up to three times per calendar month without penalty.

Logging between 4 and 7 hours in a single business day is calculated as a Half-Day presence, deducting 0.5 days from casual leave.

Logging fewer than 4 hours without authorized leave approval is calculated as an Unexcused Absence and results in full daily wage deduction.

Monthly attendance percentage is computed as: (Total Present Days + Approved Leave Days) divided by Total Working Days in the calendar month multiplied by 100.
